A screenshot of a terminal window with a dark purple background. The window title bar at the top shows a close button, a maximize button, and the text 'steve@ubuntu14large: ~'. The terminal content shows a series of commands and their outputs. The user 'sbraich' is at the prompt 'ada' in the directory '~/cs510os/p1'. They enter 'j;lkjl;j', which results in three separate error messages: '-bash: j: command not found', '-bash: lkjl: command not found', and '-bash: j: command not found'. After these, they enter four more empty prompts, each followed by a new line.

```
steve@ubuntu14large: ~  
sbraich@ada:~/cs510os/p1$  
sbraich@ada:~/cs510os/p1$  
sbraich@ada:~/cs510os/p1$ j;lkjl;j  
-bash: j: command not found  
-bash: lkjl: command not found  
-bash: j: command not found  
sbraich@ada:~/cs510os/p1$  
sbraich@ada:~/cs510os/p1$  
sbraich@ada:~/cs510os/p1$  
sbraich@ada:~/cs510os/p1$
```
